

REAL ANALYSIS – Semester 2011-1

Contents

| | | |
|----------|---|-----------|
| 1 | Topological and metric spaces | 3 |
| 1.1 | Basic Definitions | 3 |
| 1.2 | Some properties of topological spaces | 4 |
| 1.3 | Sequences and convergence | 5 |
| 1.4 | Metric and pseudometric spaces | 7 |
| 1.5 | Elementary properties of pseudometric spaces | 8 |
| 1.6 | Completion of metric spaces | 10 |
| 1.7 | Norms and seminorms | 11 |
| 2 | Measures | 13 |
| 2.1 | σ -Algebras and Measurable Spaces | 13 |
| 2.2 | Measurable Functions | 15 |
| 2.3 | Positive Measures | 18 |
| 2.4 | Extension of Measures | 20 |
| 2.5 | The Lebesgue Measure | 22 |
| 3 | The integral | 25 |
| 3.1 | The integral of simple functions | 25 |
| 3.2 | Integrable functions | 26 |
| 3.3 | Elementary properties of the integral | 30 |
| 3.4 | Integrals and limits | 31 |
| 3.5 | Exercises | 34 |
| 4 | The spaces \mathcal{L}^p and L^p | 37 |
| 4.1 | Elementary inequalities and seminorms | 37 |
| 4.2 | Properties of \mathcal{L}^p spaces | 40 |
| 4.3 | Hilbert spaces and L^2 | 44 |
| 5 | Measures and integrals on product spaces | 47 |
| 5.1 | The Product of measures | 47 |
| 5.2 | Fubini's Theorem | 49 |
| 6 | Relations between measures | 55 |
